

CLEAR SALICYLIC

ACTIVE: SALICYLIC ACID
INCI: SALICYLIC ACID

Salicylic acid stabilized in a self-emulsifying release system (SNEDDS), produced through the innovative **nTechnology®**. This intelligent system allows the spontaneous formation of salicylic acid micelles when in contact with water, in water-based cosmetic formulations, allowing the development of translucent and preservative-free formulations.

Greater skin
penetration

Extended
release

Best
performance

INDICATIONS:

- ⤵ Keratolytic and exfoliating action;
- ⤵ Improves the appearance of the skin, promoting the regeneration of the superficial layers;
- ⤵ Comedolytic action, unclogging pores and reducing blackheads and pimples;
- ⤵ Acne treatment;
- ⤵ Control of skin oiliness;
- ⤵ Psoriasis treatment;
- ⤵ Anti-inflammatory properties;
- ⤵ Antimicrobial properties;
- ⤵ Combats photoaging.

APPLICATIONS:

External use. Creams, gels, serums, lotions and liquid soaps.

CONCENTRATION OF USE:

1 to 20%.

nTECHNOLOGY

CLEAR SALICYLIC

The nanoencapsulation process using **nTechnology®** guarantees greater stability to salicylic acid in formulations, preventing crystallization of the active ingredient and enabling its complete solubilization.

Salicylic acid is a beta-hydroxy acid indicated for improving the appearance of the skin and in the treatment of various dermatological conditions, such as acne, psoriasis, keratosis and other disorders involving cellular hyperproliferation and the accumulation of dead cells. The mechanism of action of salicylic acid involves four main properties: keratolytic, anti-inflammatory, comedolytic and antimicrobial.
